

Drones (unmanned aerial vehicles) have become the signature weapons of the Obama administration's air strikes in Afghanistan and Pakistan. Predator and Reaper drones scout over the two countries launching Hellfire missiles into the region missing their intended targets, resulting in the deaths of many innocent people including children. San Diego is home to defense contractors General Atomics Aeronautical Systems, the world's largest and leading manufacturer of drones. General Atomics builds the Predator and Reaper drones.

**WHEN DRONES ATTACK ...**  
**CIVILIANS DIE**

**It's not Science Fiction. Unmanned drones from the US have killed over 700 Pakistani civilians and only 14 Al Qaeda leaders, a ratio of 50 innocents to 1 target! Drones are deadly, dehumanizing, and destabilizing the region. GROUND THE DRONES!**
